STANDARD SERIES

Perfecting the Air

HIGH ENERGY EFFICIENCY

RELIABLE HEATING AND COOLING

HEATING AND COOLING SOLUTIONS

STANDARD SERIES

ESSENTIAL COMFORT

Ideal for those looking for a model that covers the essentials

Daikin's Standard Series offers reliable performance when heating or cooling your home. With all the essential features and a large range of capacities, there's one to keep you comfortable whether your space is big or small.

COMFORT AIRFLOW

Discharge louvres are specially designed to stream cooling air upwards along the ceiling (coanda effect) and warm air down along the floor. This delivers rapid cooling or heating and even temperature distribution.

INVERTER POWERFUL OPERATION

Push the POWERFUL button on the remote control and you'll be relieved with a cooling or heating boost for a 20 minute period, even if the unit's already operating at high capacity.

ADVANCED PURIFICATION

Each model is fitted with a titanium apatite deodorising air purification filter that traps microscopic particles, decomposes odours and even deactivates bacteria.

- * Applicable for 20-46 Classes only.
- ** 19 dBA applies to Standard Series 20,25,35 class models during cooling mode only. Please refer to table overleaf for full details.

2-AREA INTELLIGENT EYE

The 2-area Intelligent Eye* is so clever it can now either direct airflow towards you or away from you for draught free comfort. If the room is unoccupied the unit will automatically enable energy saving operations.

OPTION

PROGRAM DRY FUNCTION

Besides reducing humidity, this function automatically controls temperature and airflow rate and will cleverly switch into cooling mode if the room temperature rises too much.

ECONO MODE

This mode limits the maximum power consumed by the system preventing the tripping of your circuit breaker should you have other household appliances operating simultaneously with your heat pump.

Note 1: The appearance of the indoor unit differs for the 80 and 90 class. Note 2: Sensitive Choice is only applicable for 20-71 Classes only.

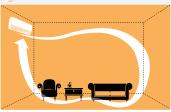

Figure 2

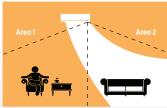

Figure 1

COANDA AIRFLOW TECHNOLOGY

 Selecting Comfort Mode during cooling operations repositions the discharge louvre horizontally and streams air upwards towards the ceiling creating the Coanda effect.

Figure

2-AREA INTELLIGENT EYE

- Designed to direct airflow away from occupants or towards occupants
- Automatically adjusts the set temperature by ±2°C when no occupation detected to save energy

Daikin Mobile Controller (Option)

Daikin's Mobile Controller allows you to control your Daikin Split System from anywhere, anytime.

ZERL (Residential) refers to 'Zoned Energy Rating Label' residential star rating as outlined in the Energy Efficiency (Energy Using Products) Amendment Regulations 2020.

Notes:
1. The Rated Capacity, Power Input and Running Current are determined under conditions T1 (cooling) or H1 (heating) of AS/NZS 3823.1.1.
Cooling: Indoor temp: 27°CDB/19°CWB, Outdoor temp: 35°CDB/24°CWB.
Heating: Indoor temp: 20°CDB/15°CWB, Outdoor temp: 7°CDB/6°CWB

- 2. The cooling (or heating) output capacity will be reduced below the rated value as the outdoor temperature approaches the maximum (or minimum) outdoor temperature operating range limit.
- The specifications, designs & information in this flyer are subject to change without notice. Unit colours shown are as close as possible to actual unit colours. Colours depicted in this flyer may vary slightly.
